## Exercise: square

5.0 points possible (graded)

**ESTIMATED TIME TO COMPLETE: 3 minutes**

Write a Python function, `square`, that takes in one number and returns the square of that number.

This function takes in one number and returns one number.

```
1 def square(x):  
2     '''  
3     x: int or float.  
4     '''  
5     # Your code here  
6
```

Press ESC then TAB or click outside of the code editor to exit
